4 (d) Study **Figure 10**, an extract from a website about a microfinance programme in Africa.

Figure 10

The Hunger Project's Microfinance Programme is a training, savings and credit programme which began in 1999. One of its schemes involved the setting up of Rural Banks. By the end of 2009 twenty Rural Banks had started to operate. The Rural Banks are independent of the main banks, and they are community owned and led by women.

The Hunger Project helps women to gain access to credit and it teaches the importance of saving. This means that the women can invest in their businesses and increase their incomes. They can then pay their children's school fees, build pit latrines, buy medicines, pay for health care, and make home improvements or build new homes.

Also, by taking part in the programme, women leaders develop self-confidence and assertiveness, gaining higher status in their households and communities.

Use **Figure 10** and your own knowledge to explain how people in the poorer part of the world can attempt to improve their own quality of life.
